*** $p < 0.01$, ** $p < 0.05$, * $p < 0.1$. OLS regressions with MODIS crop trend as the dependent variable. 'State-Guerilla Dispute' = the proportion of years (1998-2009) that government and guerilla forces have a dispute in a given municipality. 'Exposure to State' = proportion of years (1998-2009) that the non-combatant population comes in contact with government forces. 'Exposure to Guerilla' = the same definition, but for guerilla forces. Table shows robust SEs.
